Learning Commentary Documents

Following are three sample learning commentary documents written by students. Personal information has been removed.

- [Learning Commentary 1](#) "Although it was less than a year ago that I completed a Physics AP class in High School, I was surprised by how often my own ideas were challenged and changed by the basic ideas taught through this elementary curriculum. ..."
- [Learning Commentary 2](#) "I thought when I first signed up for these classes that when I completed [them] I would be relieved, and never want to take any others. Unfortunately, it is not the case. ..."
- [Learning Commentary 3](#) "I have come to the conclusion that high school physics did very little, if anything, to prepare me for science in college. ..."
