SCED 20X Learning Commentary Prompts

1. Choose and clearly identify one idea from the chapter 1 scientists’ ideas packet.

2. Describe your initial understanding of this concept or idea. What was it that you understood about the concept at the beginning? Cite specific evidence from your workbook to illustrate this understanding.

3. Discuss how your understanding of this concept or idea changed during your work in the Chapter. Highlight how your current understanding of the idea differs from your initial understanding. Cite specific evidence from your workbook to illustrate this change in your understanding.

4. Discuss the trigger experiences that led you to the changes you described in item 3 above. What specific experiment, simulator activity, small group discussion, etc. prompted you to reevaluate your ideas and change your thinking?
