Here are some potential use scenarios:

Western Washington University Faculty:

If you are a faculty member at Western, and you feel that one or more of the chapters would be useful to your students, we invite you to use any part of this text. The editors deliberately chose to offer all chapters separately (rather than as a single text) in order to facilitate the use of individual chapters a variety of instructional settings. Simply link to the relevant chapters through your Canvas course and/or your syllabi. Also, please contact the chapter author for any additional instructional support (such as an in-class research session or assignment ideas).

Western Washington University Subject Librarian:

Subject librarians can provide in-class research sessions. In preparation for a subject research session, suggest that students read a relevant chapter *prior* to the research session and formulate a single question to ask the visiting librarian. Feedback for individual chapters can be directed here.

Western Washington University Students:

Yes, this textbook free! Yes, it is authored by your local library and archival experts! We invite you to use as much or as little of this text as you like. Also, contact the chapter author for more research support.

Western Washington University Student Services Professionals:

While primarily a research guide, this textbook can also serve as an introduction to research and academic success services available at Western Libraries. Furthermore, electronically accessible versions of these chapters (for students who rely upon screen-reading technology) are available upon request to the editors.
