

Student Comments

"This class rocked."

"Wow! This course really made me think about my impact, & now I'm a vegetarian!"

"Love Dr. Shull! Personality and Passion! I felt that he made a great effort to provide unbiased information but he used his field of specialty to illustrate important points. I will attempt to take classes from him in the future."

"I absolutely loved this course, I loved the online midterm and the extra credit at the outback was very fun. My favorite guest speaker was Tom Costanza from World Vision. I was so happy to learn about that I even went home and had my parents look at the website and we are donating money for their clean water donation and thinking about sponsoring a child. That was my favorite part of the class. It changed how I think. I'd like to go help in a developing country someday because of this class. I'm discovering how much I love science and this class was excellent!"

"I LOVED this class! I am actually excited about science and the environment for the first time in my life! I hope to continue this study throughout my education. Thanks for inspiring me Shull!"

"I was excited to go to class and he made me want to talk to people about the environment."
